LDG ELECTRONICS

radio not included

AT-897 for the Yaesu FT-897

If you own a Yaesu FT-897 and want a broad range automatic antenna tuner, look no further! The AT-897 Autotuner mounts on the side of your FT-897 just like the original equipment. We even added the ability to mount the "feet" on the side of the tuner so when you're transporting your rig by the handle, you can safely set it down and not worry about scratching the case. The AT-897 takes power directly from the CAT port of the FT-897 and provides a second CAT port on the back of the tuner so hooking up another CAT device couldn't be easier. ***Suggested Price$199***

NEW! AT-1000Pro

Building on the success of the AT-1000, LDG Electronics has refined and expanded its 1KW tuner. The AT-1000Pro has an Automode that automatically starts a tuning cycle when the SWR exceeds a limit you set. Other features include:

- Operates at any power level between 5 and 1,000 watts peak. RF Relay protection software prevents tuning at greater than 125 watts.
- 2 Antenna connections
- Tunes from 1.8 to 54.0 MHz (inc. 6 meters)
- Tuning time usually under 4 seconds, transmitting near a frequency with stored tuning parameters, under 0.2 seconds.
- 2000 memories.
- All cables included.

Suggested Price $599

AT-100Pro

This desktop tuner covers all frequencies from 1.8 – 54 MHz (including 6 meters), and will automatically match your antenna in no time. It features a two-position antenna switch, allowing you to switch instantly between two antennas. The AT-100Pro requires just 1 watt for operation, but will handle up to 125 watts. All cables included. ***Suggested Price $219***

AT-200Pro

The AT-200 features LDG's new "3-D memory system" allowing up to eight antenna settings to be stored for each frequency. Handles up to 250 watts SSB or CW on 1.8 – 30 MHz, and 100 watts on 54 MH (including 6 meters). Rugged and easy-to-read LED bar graphs show power and SWR, and a function key on the front panel allows you to access data such as mode and status. All cables included. ***Suggested Price $249***

radio not included

AT-7000

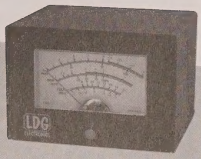
The AT-7000 is the ideal tuner for IC-7000 & other Icom Radios: Covers all frequencies from 1.8–54 MHz (including 6 meters), and will automatically match your antenna. Requires just 0.1W for operation, but will handle up to 125W (100 W on 6 m), making it suitable for everything from QRP (IC- 703 Plus) to a typical 100 W Icom transceiver. All cables included. ***Suggested Price $169***

Z-100

Designed from the ground up to provide 100 watt power handling in a small, lightweight package. Perfect for portable as well as sitting on your desk in your shack! The Z-100 will tune with 0.1 to 125 watts (50 watts on 6 meters), making it an excellent choice for almost any radio or operating style. Backpackers and QRP operators will appreciate the latching relays. Power can be removed from the tuner once you have tuned. Additionally, when it's not tuning, it draws nearly zero amps. ***Suggested Price $149***

Our customers have always known we're #1. LDG was the first company with a "no questions asked" two-year warranty on ALL our products, the first company to include all cables with our autotuners, and the first company with 3-D memory in our autotuners. LDG autotuners also have the highest resale value of any autotuner on the market today. So why wait? Get tuned to #1 at your favorite dealer!

The #1 Line of Autotuners!

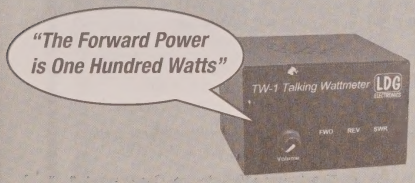


New FT Meter

LDG's new version of its popular FT-Meter presents a lush, highly readable 2.5" meter face with calibrated scales for signal strength and discriminator reading on receive, and power output, SWR, modulation, ALC action and supply voltage on transmit. Each function is selectable from the radio's menu. On/Off switch for the light.

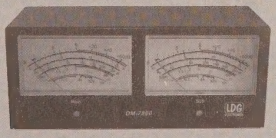
- LED back-illuminated in cool, high-visibility blue.
- Calibration adjustment is on the back of the unit; makes it easy calibrate.
- Backlight brightness adjustment is also on the back of the unit; so you can set the backlight to your desired level brightness.

The FT-Meter comes fully assembled and ready to go; just plug it into the radio and you're in the picture like never before. ***Still Only $49***



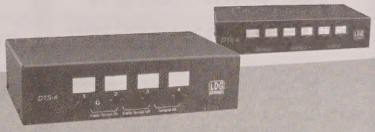
The "Talking" HF Watt Meter

The TW-1 Talking Watt meter provides an spoken indication of power and SWR using a digitally recorded voice. It is ideal for the vision-impaired, for those of us in the "bi-focal set", or just for those times when you need to be looking somewhere else. At the press of a button, the TW-1 speaks the forward power, reverse power or SWR. Three languages are included: English, Spanish and German. It includes its own internal speaker; no external audio hookups are needed. Also available TW-2 UHF/VHF. ***Suggested Price $149***



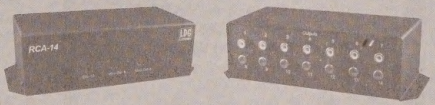
IC-7800 Owners... Your Eye-Strain Problems Solved!

Your beautiful IC-7800 deserves the best; add LDG's new DM-7800 dual meter system, and you're in the picture like never before. The DM-7800 is made exclusively for the IC-7800; order yours today. ***List Price $179***



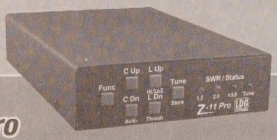
The DTS Series Antenna Switches

Instantly switch your rig between 4 or 6 antennas with the press of a button. Auto-grounding when you shut your rigdown. Purchase the additional remote control and put the DTS Series switch anywhere indoors and operate it from your desk. They handle up to 1500 watts of RF power on HF (250W on 6M), and can be used with any coax-fed antenna. ***Suggested Price: DTS-4 $79, remote $39, DTS-6 $99, remote $49***



RCA-14 Your Cable Problems Solved!

RCA-14 is a breakout box for the accessory jacks on most popular transceivers. It comes with cables with the right DIN plugs, and all the outputs are RCA jacks. You simply plug the RCA-14 into your radio's accessory jacks, and all your ports are right there at your fingertips; just plug and play, one function or all of them. The RCA-14 is compatible with: Icom 703, 706, 718, 746, 756, 7000 and 7800, Yaesu 817, 857, 897 and 840, Kenwood 480, 570, 2000, Ten Tec Orion and many more. ***Suggested Price $59***



Z-11Pro

The original portable Z-11 was one of LDG's most popular tuners, accompanying adventurous hams to their backyards, or to the ends of the earth. Now meet the Z-11Pro, everything you always wanted in a small, portable tuner. Designed from the ground up for battery operation. Only 5" x 7.7" x 1.5", and weighing only 1.5 pounds, it handles 0.1 to 125 watts, making it ideal for both QRP and standard 100 watt transceivers from 160 - 6 meters.

"With 8,000 memories in LDG's exclusive "3-D Memory" array, the Z-11Pro uses LDG's state-of-the-art processor-controlled Switched-L tuning network. It will match dipoles, verticals, inverted-Vs or virtually any coax-fed antenna. With an optional LDG balun, it will also match longwires or antennas fed with ladder-line. All cables included. ***Suggested Price $179***

Kentucky

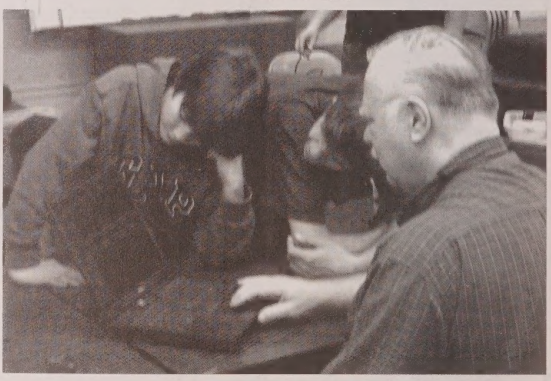
John Farler, K4AVX

Greetings from Kentucky. This is my first attempt at a report from the Bluegrass State, and I wish to thank Pat Spencer, KD4PWL, who previously wrote the column, and who has been a big help to me in getting started in the new job. Pat wrote the column for several years and did a great job. He also has the Kentucky Amateur Radio Web site and maintains the KYHAM listserv, great resources for the amateur operators in the commonwealth. Pat is becoming even more involved in emergency operations as Assistant Section Emergency Coordinator, as well as other obligations. Thanks to Pat for his work as KY correspondent, as well as all the other ways he serves. If you don't subscribe to KYHAM, I urge you to do so, as it is a timely source of information, as well as a way to get assistance and advice from other Amateurs across the state.

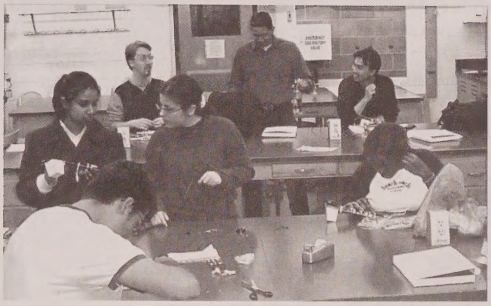
A unique class is held in Lexington by Bill Fuqua, WA4LAV, a Senior Engineer for the Department of Physics and Astronomy at the University of Kentucky. Bill has been conducting the class for over 7 years, and calls it "The Radio Theory and Construction Workshop." This workshop is for anyone who is interested in the subject of radio theory or construction. Anyone may join the workshop at any time. This workshop does not really have a beginning or an end. It is a continuing effort to help those who are interested in knowing more about the internal workings of radios (receivers, transmitters and antennas) and/or building them. Students come and go at any time during the class.



A ham license is not required, and there are no age restrictions. Young students are encouraged to participate. Participants obtain their own tools and they purchase a beginner's radio kit (AM-550K). This kit costs about $20 and it is perfect for learning soldering, component identification and basic radio theory. Bill keeps some kits in stock so no one joining the class has to wait for receipt of the kit. The sessions are held on most Saturdays for a couple of hours in the afternoon, and participants are kept in touch via email when hamfests, vacations, etc., cause a session cancellation.

To encourage youth participation, the Bluegrass Amateur Radio Society's Youth Education Program (Y.E.P.) can provide young students up through the 12th grade books, kits, tools and parts at no cost. The club has set up a separate account, and members can donate specifically to the fund.

Bill says, "I have done similar classes, but more advanced, here at the University of Kentucky for Engineering and Physics students and professors. It is really a very unusual class. And it is constantly evolving as students ask questions and we search out the answers." Bill starts with a topic and then sees where this takes the class. While he does have set objectives, he has the fantastic ability to let the students take the class in the direction that they need to go to solidify their understanding of the topic being discussed. This leads to some



solder an AM receiver kit per the instructions, Bill breaks the kit down into the parts of the radio and he has the students experiment with those parts before using the whole. Those experiments help explain what the parts do individually and Bill's approach does so without high-level math getting in the way. When the workshop was over, our students were much more knowledgeable and comfortable working with their amateur radio projects, thanks to Bill's fundamental approach to radio education."

Lately, because of his schedule, Bill now has the publicly open class at the Red Cross Building in Lexington on Saturdays. He now has some help, one of whom is Tim Knauer, a member of the UK staff who is in charge of the new Astronomical Observatory. Tim also is a ham and enjoys working with children. On any given Saturday, they usually have least 8 students and sometimes over a dozen, mostly young students with parents. At least 150 students, young and older, have gone through the classes over the years.

One participant in the open classes at the Red Cross Building is Herb Pettit, KI4NEC. Herb and his sons, Evan, 15, KI4PFH, and Ryan, 13, have all taken the class. Herb had the following to say about the class:

"Our reasons for taking Bill's class were many. Both of the boys have taken an interest in radio and electronics. I had seen the emails about Bill's class and thought it sounded interesting. After I discussed this with the boys, they also thought it would be a great idea."

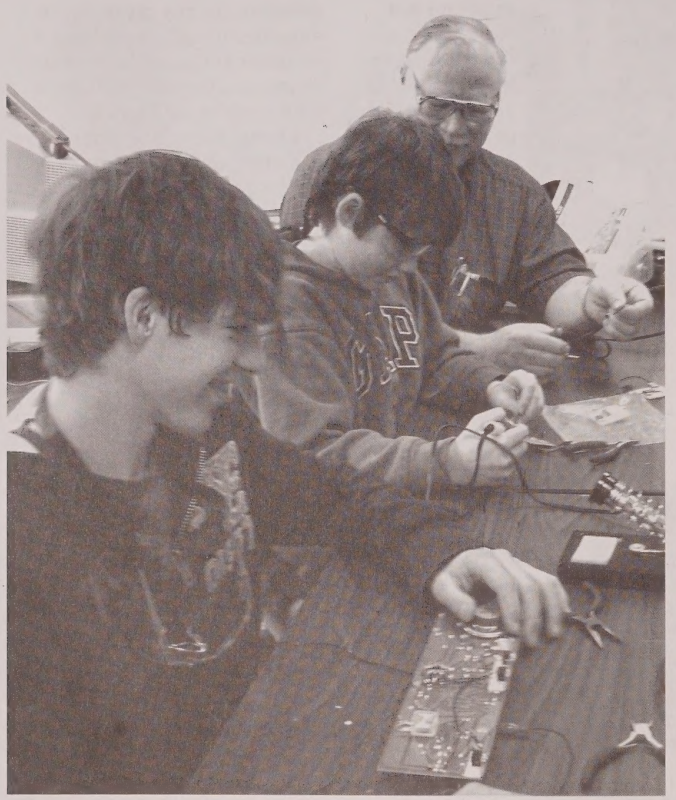
"Evan is studying for his General and Ryan for his Technician. The theory in this class has helped to add to concepts they were currently studying in school. The class work has sparked further experimentation at home. It was extremely interesting when they talked about how concepts Bill taught expanded on what they had learned in school that week."

very informative discussions.

William Smith, KG4YLM, an Associate Professor in the Dept of Electrical and Computer Engineering says he's a big fan of WA4LAV and his amateur radio projects. He relates how Bill has worked with EE students at the University, in a more advanced type of class mentioned above:

"Undergraduate electrical engineering students at the University of Kentucky have been involved with amateur radio projects in the aerospace area since 2002. Back then, we only had one experienced ham and none of the students had any course work in radio electronics. Bill Fuqua, WA4LAV, stepped in with lots of experience and advice. Bill arranged to teach a version of his "Radio Theory and Construction Workshop" for our students."

"One of Bill's passions is to make sure all of his workshop students understand the insides of radios. Rather than just



"As for myself, I am a Pharmacist. I have always had an interest in Amateur Radio. Bill's class has further solidified theory that I learned to obtain my license. My interest was not only in the theory, but also the techniques used in radio construction. I will be starting a QRP kit this month. Bill is a fantastic teacher. He brings in prototype circuits for the class to discuss and build. This has been an extremely educational experience."

Although it is not specifically constructed as an amateur license class, most of the participants do obtain licenses. Bill is doing a great job of teaching electronic theory and hands-on application of that theory, fundamentals that sometimes seems to be missing among hams who have just "learned" the question pool. We commend Bill for his work and especially for involving youth and families in this great hobby.

Pete Womack, KF4VCC, has taken over the duties of Skywarn Coordinator for the Louisville National Weather Service office from Stu Kratz, WX4ME. He is working on making a single list of the active Skywarn nets and the net ops who would be operating during a severe weather event. He needs the following info: "location of the net, name/call sign of net ops, and an e-mail address so that I could send out information regarding contact with the NWS as needed. The Louisville office is very appreciative of the support that the amateur radio community gives them, and wants to maintain that mode of communicating events in real time. I will be working on identifying improvements that can be made, especially for Bowling Green, Glasgow, Campbellsville, Lexington, and Richmond where direct radio contact is most difficult."

You can contact Pete at <pwkw@insightbb.com>.

In a related request, Pat Spencer, KD4PWL, is asking all active Skywarn groups to go to <http://www.kyham.net/encomm/skywarn.html> and make any updates for your group on the page.

Pat's feature about the KY District 4 ARES daily net in the January SERA Journal, brought information on another daily net originating in Adair County and the Central Kentucky Amateur Radio Club. Lloyd Curry, NA4D, sent the following information to Pat:

"I am the club trustee of the Central Kentucky Amateur Radio Club and our repeater is on the frequency of 146.64. The repeater is located in Adair County on the old abandoned channel 34 transmitting tower. We have very good coverage with amateurs checking in from as far away as Louisville,

Lexington, Bowling Green and Tennessee. We have a net every night at 9:30 EST (0230 Z). Our number of checkins varies from 10 to 25 or so depending on conditions and the UK ball game schedule."

"We also have another repeater linked to our system which enhances our coverage. This repeater is owned by Larry Malone, W4LJM, in Larue County, near Buffalo. The frequency is 147.255. Both repeaters are coordinated and members of SERA. Thanks for your service to the hams in Kentucky and for your articles in the SERA Journal...." 73, Lloyd Curry, NA4D, Greensburg, KY.

For ARES District 9, the area from Ashland through Pike Co., at the eastern end of the state comes information from John Hager, N4KJU. The District 9 ARES 2 meter net is on Tuesdays at 9 PM on 147.225 Tone 127.3 and is linked with the Louisa Repeater. This net will be expanded as the repeater linking program advances. The Paintsville to Louisa link is working fine and Ashland, Martin Co. and Prestonsburg links are in the works. A weather alert system has been activated on the Paintsville Repeater on 147.225, and will relay alerts automatically or manually from the NWS transmitters.

District 9 had a training session in Ashland on January 9, which was well-attended. Many positive things came from the training session. Ken Robinson, K4KBR, has developed a training program for new hams, and has presented it to several members of district 9 health departments. He is available for future training sessions.

District #9 has also started an ARES District HF net on Tuesdays at 8pm ET on 3.8200 or 3.8210. Thanks to John Hager for this info on District 10. He can be reached at <jmhager@suddenlink.net>.

I thank Mike McCown, K4ITF, KY SERA Director, for recommending me for this job. He probably knows I will get even with him somehow in the future. As for a little history (yes, I guess it's history when you have been around as long as I have), I've been licensed since I was 16, have been active ever since, except for a few years in college, and have tried most of the modes of operation and most facets and interests within the hobby.

As far as SERA and repeaters go, I helped establish the first local repeater here in Hazard, KY with the old state coordinator, William Tooley, in about 1975-76. This repeater was coordinated and on the air before KY became a part of SERA, or its forerunner. I was a member of SERA (CVRA) before KY or even EKY became a member state. Somewhere, I have the edition of the SERA Journal announcing Kentucky's new membership in the organization. I appreciate the fact that SERA has achieved its difficult tasks as a volunteer organization, a fact which keeps it right-on as to mission.

My present interests include a continuing involvement in KYN (KY CW Net), QRP, and acting as the manager of a WCARS VE team. I am very interested in getting new hams started in the hobby, and am pleased to see that we have some great younger folks coming along.

Thanks to those who sent info, and don't forget to check out and use KYHAM for up-to-date information.

John Farler, K4AVX

It's All Free!

Did you know that SERA assistance in coordination, technical help, or interference information is FREE. We do not charge for any of our services. Our operating expenses are derived solely from voluntary membership of Repeater Owners and users.

In 2008, SERA enters it's 37th year of successful operation and service in the South-Eastern 8-states.

Our volunteers are here for you. If you have any questions about SERA, don't hesitate to call or ask. It's that Simple!

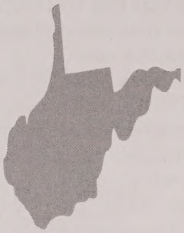
West Virginia



Morris G Kittle, AD8T

Greetings all, from Elkins, WV. I will be attempting to take the reins from Rich as your WV correspondent. I've known Rich for a long time, and I have enjoyed his columns and his friendship. In fact, I first learned of his "retirement" through this column. What I hope to accomplish is to give some different perspectives on radio and related topics. I admit that I prefer to avoid controversy when possible. The Bible says "To everything there is a season..." This column is intended to bring enjoyment and to communicate. There are other forums to get people fired up, involved, influenced, motivated, and so on. There is so much to be thankful for in our hobby (and let us never forget, it is a hobby, although broad and special), and perhaps I will be able to get readers to grin at themselves from time to time. After all, we are quite aware that we are an "interesting" group. It has been pointed out many times; a look around at a hamfest will confirm it!

I've been a ham since getting my Novice in July 1976, the Bicentennial year. My main Elmer was WB8AKR, a fine operator and gentleman; I was also Elmered by WA8YHH, W8TGF, K8TPF, and WA8AYB. N8ER has been my best ham friend over the years.

Being interested in science and technology, I always knew what Amateur radio was, but didn't get into it 'til I was 29, having been busy with science teaching and music on the side. I slowed down during the son-raising years, but am getting more active again now. My sons are KC8JDA and KB8MVD, neither active at present.

I was born in WV, spent my childhood in south-central GA—lived in Peach, Bibb, Twiggs, and Burke counties. My family and I like to visit Tybee Island and we expect to make another pilgrimage this summer. I returned to WV in 1964, in 1970 married Janet, a fellow band student, and except for a brief foray in Charlotte with then-Dixie Radio Supply Co., have been back here ever since. I taught physics and chemistry for 18 years, and have been Director of Technology for the local school district for 18 years. I have a business repairing band instruments since 1984. This I do 3 nights a week after exercise. I play sax and clarinet in several local groups.

Hamming interests are low-band CW, all modes on 10m when it's open, and 2m FM. I've tried some of the digital modes and packet, but I find I'm more of a traditionalist ham, preferring to avoid computer talk, or depending on Bill Gates for radio communications! This is mainly because I deal with computers, software, and networks all day long. I have an old laptop with Linux that I'm playing with now. I am interested in various forms of rifle and pistol shooting, and am a half-baked bird watcher, photographer, and ¼-baked astronomer. I used to do a lot of caving when I wasn't so stiff, but now mostly enjoy that vicariously, as my oldest son has taken it up. I also love cars—new, old, if it is any car out of the ordinary, especially any kind of classic or muscle, I'm a fan.

Now that the bio is out of the way, I will try to minimize the use of "I" from now on. Let me have your ideas and thoughts about ham radio, the repeater scene, changing technology, or whatever might be of general interest to you.

"Ken-fusion", or Model Migraine: Kenwood is running an ad for the RC-D710, which is presented as a "stand-alone1200/9600 bps TNC w/APRS." Fine so far. But then they lose me. The text says "with supplied accessories the RC-D710 is a full upgrade to the TM-V71A. The TM-V71A will have full functionality of the TM-D710A...". My first natural question is, what are the TM-V71A and TM-D710A? The page shows three different VHF/UHF rigs, the TM-G707A, TM-V7A, and the TM-D700A. Note that so far, there are six model numbers mentioned or shown in the ad, and I have no idea what they are talking about. I read the ad very carefully several times, but I am unable to decode it. Probably if you are intimately acquainted with their product line, including items not shown, it would make sense. Oh, and the TNC unit is styled differently from all three transceivers. Gee. I hope there is a typo in the ad; that could explain the apparent confusion. It bothers me when I have to study an ad

and still can't decipher it. This is nothing against KW—I'm griping about the ad itself.

Hey, let's set aside specs... what styling do you prefer in a transceiver? It seems that nowadays, all units on the market have some degree of "military" styling, or at least, what we have come to call military styling. If you're not old enough to remember the "pre-military-radio" days, you've probably seen ads or old rigs at hamfests. The Yaesu FTdx-100 from the late '60's, or the famous "Kenwood twins" had a distinctly rectangular appearance, often with brushed aluminum trim, and sharp corners. I think the Ten-Tec rigs were the last to have this styling, after the other big manufacturers had gone over to the rounded-corner, olive-drab, modular look. Two Yaesus and an Icom make up my VHF gear. Nowadays there isn't much of a choice in regard to styling. It seems the "mil" look won the battle. I don't know where Heathkit fits—they always seemed to be, well, Heath-looking. Unmistakable...not military, not "modern '70's", but Heath...green! (except for the early and late Heath gray!). Did they copy the look from Collins, or was that just how radios looked in the 50's and 60's? If you are interested in comparing the old gear, there is a good web site with photos-- <http://www.rigpix.com>

General coverage receiver, you say? It seems that the vast majority of HF rigs these days have general coverage receivers, probably in many cases to the detriment of the ham band specs. But apparently the majority of hams expect this feature, and the manufacturers have more marketability to government and other users, or they wouldn't keep producing them. I do wonder if GC is more important to US or to DX hams. Checking WWV doesn't count now! How many hams use that general coverage receiver?!! Short Wave Listening being a hobby in itself, I don't have the time I would like to use the ham bands, let alone SWL.

Occasionally I do venture outside the "fence". Tonight a friend called me because there is a shortwave broadcast he wanted me to hear. But other than tuning the local AM Broadcast & WWV, I haven't been outside the amateur bands for many months. In the July 2007 QST there are a couple relevant paragraphs under "Why General Coverage?"

How about you? Would you give up general coverage if the rig had better specs on the ham bands at the same price? Or, are you like me, a casual operator who just likes to have it "in case", even though it represents some compromise in the receiver? Perhaps the new Digital Signal Processor and software-defined rigs can do both optimally; but at this point they are either home-brew or fairly expensive. I won't be considering one until they can be had at a lower price, and we have some options as to operating systems on the commercial models. I don't know if I'll live long enough to own one of those rascals. If you want to be bleeding edge, you have to pay the piper.

This is also true of the new digital voice VHF radios! A complete system is quite expensive. But you knew that. Well, SSB rigs were relatively expensive, once! Like all technology, the prices of digital systems will come down. The topic is a land mine of strong opinions, but it seems to me that the SERA Board is doing the right thing by being pro-active as to D-Star and other DVT repeaters. In my 32 years hamming, one thing has been clear: If a technology is perceived as having real value to a significant group, it won't be stopped. So, the logical thing is to be ready if it should take off like VHF FM repeaters did once upon a time. Of course there are some DVT systems in the field already. Demos of them, videos of which are available online, are very impressive. My guess is that, despite the expense, this is going to really take off, starting now.

The way I operate, where I normally travel, I don't *need* a digital repeater--- even though we're out in the country on the Western slopes of the mountains, twenty 2m repeaters cover this area. Half of them can be used mobile (more reliably than cell phones.) Nevertheless, if my friends start getting digital voice rigs, I'll get one too. The cost of the repeaters can reasonably be absorbed by large clubs (or wealthy hams); it will take awhile before they become affordable for smaller groups. Do you think it will happen, and how quickly?

I'll sign off with some random questions for you to consider: When was the last time you were on VHF or UHF simplex? What implications does it have for your operations if you lived in a Radio Quiet Zone as many of us do in VA & WV? When portable phones go to satellite technology down the road (just my prediction), what will happen to all these cell towers? Thank you for reading. I would like to hear from you, regarding repeater/club or other activities, news, and issues. I ran across a handy reference: VHF (& HF) nets in WV: http://www.arrl.org/sections/?sect=WV

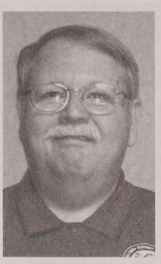
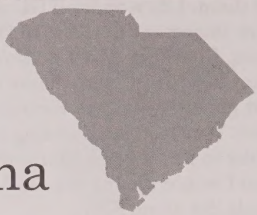
73, Mo AD8T



South Carolina



Roger Gregory, W4RWG

Hello South Carolina,

The **Anderson Radio Club** holds a net every night at 20:30 on the 146.790 repeaters. They meet at the Anderson EOC the 4th Thursday of each month at 19:30 hrs. I saw in a recent newsletter that Walt Sanders, W4ZJI, was a patient at the National Health Care Facility in Anderson. I hope he as improved and returned home. The ARC will hold the 30th Annual Lake Hartwell Hamfest on October 18, 2008. Admission is still FREE. The location is Darwin Wright Park in Anderson. Talk-in will be on the 146.790 repeater.

The **Florence Amateur Radio Club** ran a Special Event Station on March 8-9 to commemorate the 50th Anniversary of the Mars Bluff Bomb Drop. On March 11, 1958 a nuclear bomb fell in the garden of the home of Walter Gregg in Mars Bluff, S.C. They used the callsign of N4B and operated on 80, 40, and 20 meters. This was the same week-end of the Charlotte Hamfest. I hope they did well. The FARC welcomes new member Glenn Greene, KE4GV, who is an Attorney.

The FARC also wants to congratulate Greg Davis, N3ZL, for receiving his Eagle Scout Award. Greg is an Extra Class Operator. His Eagle project was the installation of 2 meter antennas at several Red Cross Shelters so that the Shelters could communicate from the Shelters to the Red Cross Operations Center.

The **Foothills Amateur Radio Club** has 2 repeaters: 2 meters (146.700-mhz PL tone 107.2) and 440mhz (442.125). The FARC is located in Pickens, SC and their website is located at <www.wt4f.org>.

The **Greenwood Amateur Radio Society** welcomes new members Ken Maffet, KJ4BAK, Stephen Lydia, KI4ZSY, and Franklin Mitchell, WB4BWK. The GARS holds a Ladies net every Tuesday night at 8 pm on the 147.165 repeater. Their other net is held on Thursday night at 9 pm for all amateurs. The GARS and I extend out sympathy to the family of Tillaman Ayers, K4CBG, who became a SK on January 24, 2008.

The **Pickens County Emergency Communications Group** was pleased to have Vince Dicarlo from the Greenville Office of the National Weather Service teach classes on Basic and Advanced Weather Spotters. These classes were given at the Emergency Operations Center in Wahalla, SC on May 17 and 18. The PCECG also setup a Special Event Station at the "Battle of Central" in Central, SC.

The **Ridge Amateur Radio Club** recently held a program on ESD (Electro Static Discharge). On March 25, the Aiken Emergency Communications Trailer was on display at Shealy's in the grass parking lot. Remember the Experimenters net on the 1st Saturday of each month 2100 hrs on 3.959.00.

The 2nd annual tailgate party will/was held in Leesville on April 26. At Shealy's on the grass.

The **Salkehatchie Amateur Radio Society** was fortunate to have Roger Riley speak to the membership on Pandemic Flu, how it starts, spreads, economic and environmental impact. He said every home should stock enough canned food, water, toilet tissue, medicine, etc. to survive six to eight weeks. We hope that never happens, but we should be prepared for the worst. Roger was made an Honorary Life Member of the SARS.

The **Spartanburg Amateur Radio Club** held a "fox hunt" on January 26. Lisa Davis, KG4ZRR, was the winner. The SARC helped with the March of Dimes walk on April 26.

Recently the tower crew of the SARC removed the tower and antennas of SK Marshall Hodge, W4MLH, in Union, S.C. It was very sad for me to arrange this for Marshall's wife. Marshall and I were "Best Friends" for 35 years. Our friendship went all the way back to the "serious CB days." Marshall, his son Tony, KD4YFD, and I passed our first Technician test together in Spartanburg at the Red Cross Building way back in 1992. We were KD4YFB, KD4YFC, and KD4YFD. Marshall passed away in November of 2004. I appreciate Art and the members of the tower crew for handling this for us. I just couldn't be there to watch. I hope you understand.

The **Union County Amateur Radio Club**. The Union WCARS VE Team holds exam sessions the 2nd Thursday in January, March, May, July, September, and November at 7:00 pm in the Union County 911 Center training room on North Pinckney Street in Union, S.C. Contact Jim, WJ4C, for information, <wj4c@charter.net>

Attention South Carolina Repeater Owners: are you a SERA Full Member? Consider joining the **SouthEastern Repeater Association**. The cost is only $20.00 per year. Send your full membership dues in today. Let's make South Carolina 100%. SERA needs your support and with full membership not only will you support the SouthEastern Repeater Association, you and your designee will receive the Repeater Journal for as long as you are a full member. What a deal!

Would you like to see news from your club in the journal? It's easy! Tell your club Secretary to make sure I am on their newsletter mailing list.

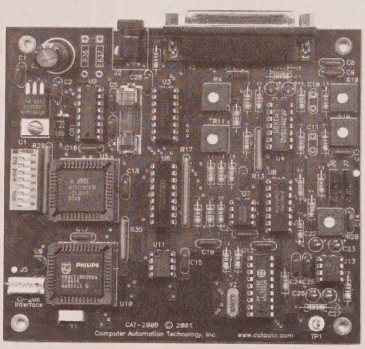
CAT-200 Repeater Controller

This controller was specially developed to provide remote base linking operation and a voice synthesizer at an extremely affordable price.



Features Include:

- *Voice Synthesizer ID*
- *(12) Voice Messages*
- *CW Identifier*
- *Beacon Message*
- *Remote Base Port*
- *DTMF Audio Muting*
- *DTMF Pad Test*
- *(30) Control Functions*
- *(4) Logic Inputs*
- *(4) Output Switches*
- *Optional Peet Weather Station Interface **
- *Optional Windows ® Editor Program **

** Requires CI-200 Computer Interface*

Ordering Information

CAT-200 *Controller Board, Wired & Tested* ***$199.00***
RME-200L *Rack Mount Enclosure* ***$49.00***
CI-200 *Computer Interface and Windows Editor* ***$59.00***

North Carolina

Michael J. Lewis, WA4KE

In my last column, I noted that each person should try to attend as many hamfests as possible this year and support your local clubs. It has recently come to my attention that the Shelby Hamfest location is in limbo. Please visit the following website to determine the status of this hamfest as September approaches. <http://www.shelby-hamfest.org/>

It's with great sadness that I report the passing of Bill Edwards, K4BWC. Mr. Edwards passed away on 20 March 2008. Bill was the owner of Omega Electronics in Knightdale, NC and provided parts and service for vintage amateur power amplifiers. Bill was born in Sumter County, SC on February 11, 1938 to the late Marvin William Edwards, Sr. and Sarah Sparks Edwards. Mr. Edwards was a native of Sumter, SC. He attended Edmunds High School and Clemson University. He was an Amateur (Ham) Radio operator for more than 50 years. He worked for the U-Haul Company for more than 20 years. He was also President and CEO of Omega Electronics and has lived in Raleigh for 37 years.

On May 3 between the hours of 1200Z-2000Z, the Azalea Coast Amateur Radio Club, NI4BK, will sponsor a special event station to coincide with the commissioning of submarine USS North Carolina. The club will be operating on SSB CW 20 40 m Gen bands EchoLink 353118 KI4RMS-L IRLP 9120 N4JDW VHF/UHF HF.

Congratulations to Mike Costabile, WD4MGP, of Bolivia (Brunswick County) for an article in the Wilmington Star-News. His company, Precision Time, and its products were featured. Mike invented and holds a patent on a device that allows basketball referees to stop the clock instantaneously, thereby eliminating any accusations of lags in time or human error. The system, which uses RF technology tuned to the frequency of the ref's whistle, is in use in the NBA, NCAA and the Olympics. Mike developed the system with John Guerriero, KG4HDT, who lives outside Raleigh and is the ARES liaison to the State EOC.

On Saturday, February 9, 24 Boy Scouts from southeastern North Carolina earned the Radio Merit Badge, thanks to a class held by Bill Morine, N2COP, Paul Gawron, KI4SPO and Jonathan Friedel, W4JRF. It was a crystal clear day in quaint, historic Southport as the boys watched N2COP make QSOs with stations in Massachusetts, Louisiana, Mississippi, Texas, Arizona and even Mexico in less than 10 minutes through the AO-51 Echo satellite. Later, the boys heard and learned the many functions of WWV and CHU for time synchronization, talked on 20 meter HF with a station in Holland, and even tapped out some CW on 30 meters under the watchful eye of the control ops.

The KARS sponsored tour of the County Communications Facility has been set for Saturday March 1 at 1 PM. This is an excellent opportunity for club members and their guests to learn how our county conducts it's communications for police, fire, paramedic and emergency operations. This is a state of the art facility. The facility is located at 200 Rhodes Ave, Kinston.

I would like to welcome the Blue Ridge ARC to my mailbox. Michael Parente, AI4GR, of the BRARC has started sending me the club newsletter. Twelve members of the Blue Ridge Amateur Radio Club and Henderson County ARES gathered bright and early on December 8 to help put on the 2007 Fletcher Christmas Parade. The Fletcher Parks and Rec department treated all to a hearty breakfast at Town Hall at 7:30 AM. The pre-parade meeting was held at 8:45 and we headed out to take up our positions. The group made sure that everyone was lined up correctly and that all went well. As usual, Sid kept us in order as net control. Thanks to KF4HAT and KE4SMZ for showing up extra early to help put the repeater on the air. The city of Fletcher again was appreciative of our efforts.

Public Service Opportunities in Wake County: NC Relay for Life – Benefiting the American Cancer Society, Saturday, April 26, 7:30 AM 'till Noon, Panther Creek High School in Cary, 6770 McCrimmon Parkway. Contact John Snellen AI4RT, <ai4rt@hotmail.com>; WALK MS – Benefiting the National Multiple Sclerosis Society Saturday, May 3, RBC Center,

Contact Bob Condor, K4RLC, or Alanna Condor, K4AAC, <k4rlc@earthlink.net>

Ham Chatter and BARC photos on CD - A CD with the first 103 issues of Ham Chatter edited by Dave Langley, W4YDY, is available. They are from June 1997 to December 2005 in the PDF format and Adobe Reader Version 7 is included on the CD for those that do not have it installed. Also, 10 years of photos and commentary for BARC Field Day operations from 1996 to 2005 is on the CD along with several special event station operations. The menus and photo pages are in the HTML format and it will use your browser. Cost was $5.00. PRICE CUT! It's cheaper now. It will be used for a small fund raiser for BARC. Anyone who may be interested may contact Richard Cox, K4CRD, BARC Treasurer, k4crd @ embarqmail.com or pick up one at the club meeting or email <barc@w4amc.com>.

On February 6 Jim MacLeod, W4NHV, received a Lifetime Achievement Award from the Mecklenburg Amateur Radio Society. Jim lives in Lumberton, but in 1949 he was the minister at a Presbyterian church in Charlotte. At an informal gathering of half a dozen hams in his living room, the MARS club was formed. It's still going strong 59 years later and Jim is now the last surviving charter member.

STATION LOCATOR SERVICE FOR FIELD DAY 2008 - This year, for the first time, the ARRL has put together a Station Locator to help amateurs or those interested in Amateur Radio find a Field Day site near them. According to ARRL Field Day Manager Dan Henderson, N1ND, many amateurs have been asking for something like this for many years. If your group would like to be a part of the Station Locator Service, it's easy to get started. Just go to the Field Day Station Locator Web site <http://www.arrl.org/contests/announcements/fd/locator.php> and follow the instructions.

The Azalea Coast Amateur Radio Club is donating four ARRL license study guides per year for each of the four branches in the New Hanover County (Wilmington) Library system. In 2006, we donated four of the then newly released Technician guide, and last week we contributed four of the new General guides. Later this year we'll donate four Amateur Extra class license study guides once they are released. It's the club's goal to keep one set of the current license question pools for each of the three license levels available at each branch of our county's library system.

At a recent meeting of the ARRL Executive Committee, HQ staff learned that there was a discussion of the important role played by local clubs in recruiting, training and mentoring new licensees. Some clubs are very successful. A part of ARRL's effort to increase the number of new radio amateurs should be to help recognize the clubs that are doing a good job, and to educate and encourage other clubs to follow their example. As a first step, it would be very helpful if your club's officer would identify what your club does in the way of recruiting, training and mentoring new licensees. Please send me those emails. Thanks.

In closing I would like to thank the editors of the newsletters that provide the club news which I plagiarize each quarter. Please continue to send the emails and newsletters for your club. As space permits, we try to publicize the clubs' events as much as possible.
Thanks! <WA4KE@sera.org>

Enjoying the Benefits of PCRN

by Jim Hightower, W4JLH

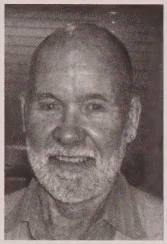
Special to the SERA Repeater Journal

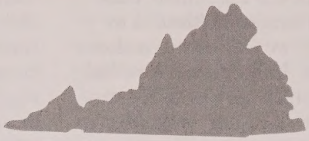
I recently had an occasion to travel from Greensboro, NC to Charleston, SC on business. I left around 7:15 am and "signed" on the W4GG, 145.250 MHz repeater. Larry McLauren, W4LMM, answered and thus began about four and one-half hours of enjoyable traveling and QSO's with several hams. N4BFD, Jesse, soon joined in and I discovered that he was also going to Charleston, SC to visit a relative and was several miles behind me. He, Larry and I talked until we reached the limit of the repeater's coverage near Ellerbe, NC. Believing that we were not in simplex range, I suggested that we meet on the Dillon, SC, repeater a little later. I was familiar with the Dillon repeater, 146.745, and knew that it is a wide coverage machine. It is one of the PCRN's (Piedmont Coastal Repeater Association) repeaters. The system is a series of two meter repeaters throughout North and South Carolina, Virginia and West Virginia. Members can link to any of the repeaters on the system by entering the local repeater's access code, which brings up the 440 MHz "backbone" system. Then the distant repeater is accessed by its code. Once connected, you simply give the distant ham operator a call and it's like being on one repeater.

I told Larry, in Greensboro, that I would try to contact him on the "link" when I got into the Dillon repeater's coverage area. Jesse and I agreed to meet there also. Before we got to Rockingham, Jesse and I got together on the Dillon machine. I eventually brought up the link system and began talking with W4LMM, Larry and Dave, W4TR, both in Greensboro. We had a nice QSO on the link between Greensboro and Dillon. I did not know it at the time, but Jesse is Dave's son. After we got out of the Dillon repeater range Jesse and I exchanged our 73's. As I was later traveling into Charleston on I-26, I had my Alinco DR610 in the scan mode and heard Jesse call me on 146.520 simplex. We continued our conversation on into Charleston until we came to our respective exits.

Danny Hampton, K4ITL, assisted me in making my initial connection with the link system. Sometimes, due to fluctuations in your signal, particularly if you are a great distance from the access repeater, your input tones cannot be deciphered. I think Danny monitors the backbone frequency 24/7. It seems that way, because anytime I need help in using the system, Danny almost always is there to help. When you first join PCRN, you are given the information on how to utilize the system, all of the access codes for the various repeaters, and some rules and guidelines that members are expected to follow. The organization requests a very nominal donation of twenty dollars to become a member. It is a great system that I would like to see utilized more often.

To learn much more about the system, go to <www.pcrn.net>. There you will find a listing of the member repeaters, a listing of all the amateur radio operators who are members (updated February 18, 2008), a history of the system, and how to become a member.





Virginia

Fred Weaver, KG4BKI

Greetings from Zuni.

Frostfest 2008

The hamfest season was kicked off by Frostfest at a new location; Richmond Raceway Complex. Sponsored annually by the Richmond Telecommunications Society (RATS), the move to the new venue appeared to be a positive one. Accompanying Austin Amateur Radio was a much more robust group of commercial vendors than has been seen in the recent past. The 2008 web site is still on line at <www.frostfest.com>.

There was a full slate of forums; ARRL, APRS, AMSAT, MARS, K-9 Rescue, and ARES. The forums are now in a separate building and this is a big improvement. Readers may recall coverage in this column on the K-9 Rescue program. Most of the volunteers in that program are licensed Amateurs.

Bob Bruninga, WB4APR, had his heavily modified Toyota Prius Hybrid on display. He has added an additional battery pack to increase the standard battery capacity along with solar panels on the roof and hood for supplemental charging. He has also tapped the battery packs for external power through voltage converters and AC inverters. (The standard voltage of a Prius is 200VDC.)

I had the very pleasant experience of meeting some of the hams who had been early participants, and helped establish the VDN (Virginia Digital Net). It was very nice to participate in this gathering. Go to <www.aresva.org> and click on NTS nets for info on the VDN.

Tidewater Wireless W4VB

Readers may recall a bit of news on this group in the last issue of the RJ. At that time their 220 repeater was in the works. This report submitted by Steve

Program your amateur radio like a Pro

with software from

RT Systems, Inc.

Since 1995. The original software for amateur radio programming.

RT Systems software is approved for use by major radio manufacturers and available through their dealers.

Platt, KC4JGC.

"Tidewater Wireless, the organization that sponsors the repeaters in Norfolk has a new repeater on the air: 224.400. Stro, KO4FR, and myself installed the repeater at John Knox Tower in the Ghent section of Norfolk on Saturday March 15. There is no PL required to access this machine. It is cross linked full time to 145.33 and 442.95.

Also, a reminder that the 224.54 WB4PVT is linked to 442.95 Monday through Wednesday 7:30pm each week for the Radio Amateur Society of Norfolk (RASON) net. On Mondays at 8 pm it is linked to 146.67 for the York/Poquoson ARES. Maybe LPEN net on Tuesdays in future?

In the past I've had 224.54 linked into a statewide net. I'm on the mailing list to be advised when the next net will run. As far as I know, our machine is the ONLY 220 machine in Virginia that has participated. We had been linked to that net via the Franklin UHF repeater. Now that the 2m remote base is again available (thanks to KO4FR), we can link to a closer repeater. I've received a verbal agreement from Chris, KC-4CMR, to link into Williamsburg 146.76 at that time. I will need to confirm with him when that time comes. "

Tidewater Wireless is at <www.w4vb.org>; and RASON is at <www.rasonva.com>.

Shamrock Marathon.

A more dedicated group of Amateur volunteers would be hard to find than the group supporting the annual Shamrock Sports Festival. At least 50 Amateurs representing most of the areas' clubs support communications for the event. Just one example of that dedication is the net control which starts at 7 am for the start of the ½ Marathon and runs continuously until 3 pm when the Marathon course is cleared. That task is handled by Tom, WS9B, and Butch Burke, KE4AZL.

Amateurs are tasked with placing markers at each mile marker for both ½ and full marathons and with placing and starting the clocks. There is Amateur communications from most markers, water stops, sag wagons, and the race director has a 'shadow' operator. Overall coordination is handled by Al Crawford, WA4TCJ, of the Virginia Beach ARC. <www.w4ug.com>

I provided the "Tail-End Charlie" vehicle again this year, using my Cushman industrial truck. It looks very much like a familiar 'meter maid' vehicle. It's outfitted with a 2M rig and a mag mount. The best thanks a ham can get were received at the end of the event, "Good signal all day".

The best posting for the event is probably Water Stop 9. In addition to water and a sports drink, they have beer on tap!

South Hill Gang Revisited.

A couple of years ago I reported on an informal group of Amateurs that was meeting monthly in South Hill. For several reasons, mostly related to ARES coordination, Chris

Report for Central VA:

- No coordinations in January

- Completed NOPCs (Feb-Mar):

Charlottesville, VA	145.450-	K4DND	
Buckingham, VA	444.950+	WW4GW	
Roanoke, VA	145.210-	N2EDE	
Roanoke, VA	224.940-	N2EDE	

- Received On-Air notices:

Charlottesville, VA	145.450-	K4DND	

- In progress:

Charlottesville, VA	146.925-	WA4TFZ	(relocation)
Charlottesville, VA	224.760-	WA4TFZ	(relocation)

Jay, N4YMY

Hanslits, W4VX, (DEC 10) and I traveled to the group's new meeting place in Bracey. Boy, have things changed! The group is now the Lake Country Amateur Radio Club.

We were welcomed by club President Gary Turner, W4WGT, (EC Brunswick Co.) and the rest of the club for a very pleasant breakfast meeting. Here are some of the things they are up to:

- A pending Skywarn training session
- Recently completed training session that passed 14 of 14 Technicians
- Completed a Terrorism Security and Awareness Orientation program through the Virginia Department of Health.
- Field Day 2007

Visit their web site at <www.lcarsonline.org>. Information on ARES activities in that area can be found at <www.lakecountryars.org>. The net there is on Mondays at 8:30 and links Jarratt, Mecklenburg County, South Hill, and Roanoke Rapids, NC. The frequencies of the linked repeaters are on the web site.

Springfest 2008 had to overcome some dreary weather again this year. This is the third year at the Moose Lodge in Chesapeake. The primary vendor is Cedar City Sales who seems to specialize in this type of event. There was no tailgating due to the weather. The sponsoring club (Chesapeake Amateur Radio Service) made some money and the test session had some success with new hams and upgrades. This is a nice little hamfest and a great place to catch up with friends.

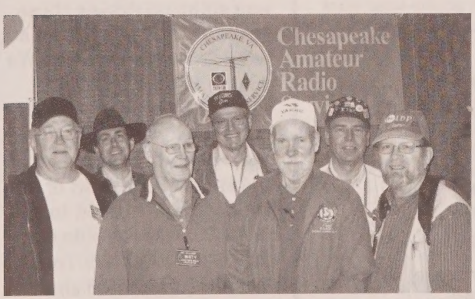
Jarvis Hearn Sr., W4RGN, marks 100th Birthday. Could Jarvis be the oldest active ham in Virginia?

Jarvis has been a fellow club member of mine (Western Tidewater Radio Association) for many years, yet I have only met him on the radio. While he is hampered by fading vision and hearing, he still checks into a daily net on HF. He is known by his familiar mnemonic – Red, Green, Neutral. The local paper (Smithfield Times) ran a very nice piece with a color picture of him in his shack.

Birthday greetings to Jarvis.

73 from Podunk. bki>

Jim K4YM assists a new SERA member at Frostfest



An unofficial meeting of VDN. Front, L-R, Dave K4DND, Art W4TY, Dave K4DPF. Rear, L-R. Marshall AI4CM, Glen W4GHS, Bruce K7BC.

Captain America and the 80m Sloper

by Gene Zimmerman, W3ZZ

Very Special to the SERA Repeater Journal

Back in the late 60's I lived in a high rise apartment in Rockville on the 7th floor. My apartment had a balcony held up by large steel girders [makes a great ground] and facing a wooded area across from a parking lot. I originally built a quarter wave sloper for 80 meters from #26 formvar coated magnet wire; hanging it from a 12 foot fishing pole mounted to a plate affixed to the balcony railing and then falling down vertically toward the ground. I realized that I could have a permanent installation by eliminating the fish pole, mounting the wire at the railing, putting an insulator on the end of the wire [I used a rugged button] and then dragging strong fishing line attached to the other end of the button out to that row of trees, yielding an essentially invisible antenna.

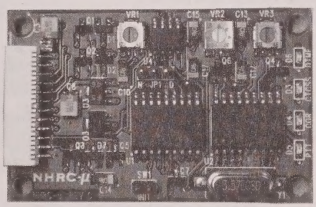
One day, PVRC member Tom, N6RA/W3DPJ, who had moved to San Francisco, was staying with me on a trip back East. I asked him if he would be willing to help me make a permanent installation of my quarter wave sloper. He readily agreed. I did notice that he was wearing a Captain America costume complete with cape, but in those days such attire was not all that unusual. [Tom says that he remembers this, but not why he was wearing the Captain America suit - given what was going on during those years it just seemed like a reasonable thing to do.] We waited almost until dusk so that the antenna would really be invisible and Tom went outside to stand on the sidewalk in front of my window. I proceeded to toss the wire over the side of my balcony. I could see Tom look for it and then shaking his head and signaling with his thumbs up - pull up the wire. So I pulled

NHRC

REPEATER CONTROLLERS

NHRC-μ (Micro)

Ultra-Compact
Repeater Controller/IDer



(actual size 1.25" x 2.00")

NHRC-μ Features

- Repeater Controller, IDer, or Beacon modes
- High and low-going COR and CTCSS inputs
- Extremely compact
- "Intelligent" ID algorithm
- Programmable CW ID speed and pitch
- 21 Control operator settings
- 4 User commands
- 5 Saved setups
- Touch-Tone remote control and programming
- Windows™ based, serial port programming
- Hang timer, ID timer, Timeout timer, and CW messages stored in non-volatile memory
- Jumper-selectable receiver deemphasis
- LED CAS, CTCSS, PTT, and DTMF indicators
- Extremely low power consumption

The NHRC-μ ("Micro") is a compact repeater controller/IDer designed for easy installation in close quarters. The NHRC-μ can function as a conventional repeater controller, as an IDer for repeaters, or as a beacon controller. It can be easily mounted with double-sided foam adhesive tape, and connected to the equipment with flying leads, allowing for easy installation in almost any equipment.

The NHRC-μ is programmable by sending DTMF sequences over the air, or by computer with a serial port connection and the free NHRC-μ programming software. The CW ID, hang time, ID timer, timeout timer and courtesy tone beeps can all be programmed by the user. All programming is stored in non-volatile EEPROM memory.

The NHRC-μ (Micro) (Assembled and Tested): **$119** plus shipping and handling

on the wire, but it was clearly stuck on something. Tom shook his head "No" and signaled again to pull up the wire. This time I gave it a sharp jerk and I was rewarded with some loud thumping noises. Now Tom was getting agitated and shaking his head back and forth "No" and again signaling to pull up the wire. I gave it another jerk. This time it moved a little bit more. Tom was getting even more agitated and signaling wildly to pull up the wire. I gave it a final huge jerk and was rewarded with a series of thumps and the wire came loose so I could wind it up. I looked down and Tom was running rapidly away from the building with his Captain America Cape streaming behind him.

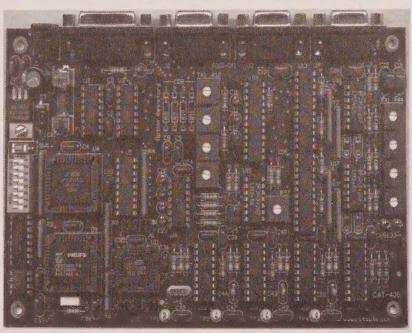
Five minutes later he was back in the apartment but laughing so hard it took him a few minutes before he could speak coherently. Apparent a gust of wind had caught the wire and blown it into a first floor balcony below me and tangled it in a lawn chair. The first two times I yanked, the chair rose up just a little bit and dropped back on the concrete floor, producing a small noise that I could barely hear. The next time the chair rose about a foot in the air and then came down with a loud crashing noise. The noise attracted the attention of the occupants of that first floor apartment. Think about what they saw.

They looked out onto their balcony only to see one of their lawn chairs now rise three feet in the air, shake violently as I attempted to loosen the antenna wire caught around it, and then come crashing to the floor as the wire broke and I reeled it in. By the time they reached their balcony, all they could see was someone in a Captain America costume running away from their balcony and their ostensibly demonically possessed chair. What would you think? Eventually, the next evening, we got the wire down to the ground, attached to the button, and strung across the parking lot to a tree where it remained for the next two years doing yeoman-like service on 80 meters until I moved to my present QTH.

So there is some excitement even in apartment antennas, and if you ever see Captain America standing [or running] in front of your house, you shouldn't be suspicious or surprised.

CAT-400 Repeater Controller

This controller combines the features of the popular CAT-250 controller and the RLS-1000 Remote Link Switch into a four- port controller ideally suited for sophisticated linking systems.



Features Include:

- Voice Synthesizer ID
- (20) Voice Messages
- (1) Repeater Port
- (3) Remote Base Ports
- (4) DTMF Decoders
- CW Identifier
- DTMF Audio Muting
- DTMF Pad Test
- (40) User Macros
- (50) Event Macros
- (64) Control Functions
- (4) Logic Inputs
- (4) Output Switches
- Internet Firmware Upgrades
- Optional Windows® Editor

Ordering Information

The 36th Annual Cary Mid-Summer

SWAPFEST

Saturday, July 19, 2008

affiliated club

Same as last year: Harold D. Ritter Park, Cary, NC

MAPQUEST → 301 W. Lochmere Dr., Cary, NC 27511 – directions below

Admission $3
Parking *FREE*

- **Tailgate Spaces $5**
  bring your own chair/table
- **Tables under shelter: $10**

- Tickets, tables and spaces sold only at the Swapfest - no advance sales.
- Limited ac power available.
- Snacks and soft drinks available in the shelter
- VE Testing by the RARS VE's nearby, at the Resurrection Lutheran Church (you pass it on the way in).

NO MAILING!
Please spread the word!

Just $3

Flea Market opens at 8 AM
Seller access at 6 AM
(no setup Friday night)

THE SERA OFFICIAL REPEATER INDEX

REPEATER LISTINGS FOR: GEORGIA ■ KENTUCKY ■ MISSISSIPPI ■ NORTH CAROLINA ■ SOUTH CAROLINA ■ TENNESSEE ■ VIRGINIA ■ WEST VIRGINIA

IMPORTANT NOTICE: The SERA ***Repeater Journal*** is Copyright 2008 by the SouthEastern Repeater Association, Inc., the officially recognized Amateur Radio Repeater Coordinating organization for Kentucky, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia.

The SERA ***Repeater Index*** may NOT be published or reproduced, in any form, by any individual, publication, electronic source, or any other means, for distribution without the expressed written consent of the SERA, Inc. All other rights reserved.

SERA will not be responsible for incorrect or omitted listings. The responsibility of correct listings is that of the actual repeater owner or sponsor. SERA makes every effort to keep the index as accurate as possible with information provided. The SERA ***Repeater Journal*** repeater lists contain certain repeaters which are NOT or have not been coordinated by SERA, or are not operating according to recognized frequency utilization plans. SERA does not necessarily condone or recognize such repeaters as being legal or illegal. They are listed in our indexes primarily to keep our readers informed of all repeaters known in the areas served by The SERA.

Some repeater owners or sponsors allow voice as well as other functions on their machine. Operators should check with owners for additional information about what is allowed, and what features are available. Digital Repeaters with normal input/output (pairs) are listed in the regular FM repeater index. Digital systems operating simplex are not coordinated by SERA and are not on our repeater lists. The *codes* column contains the tone or access code for those repeaters which the owner or trustee has given us written permission and asked that we publish them . Access tones are listed for the reader's convenience both in the By-State, and the By-Frequency listings.

Entries with "#" in front of city indicates repeaters added to this index that have not been coordinated through the local SERA state coordinator. Owners may work with their coordinator to get this indicator removed. Repeaters that have been coordinated but may not yet be on the air yet are listed with "PROP" in the codes column. Owners should notify SERA when on the air.

Repeater owners are reminded to contact their local Frequency Coordinator for assistance in coordination, changes in their listings, or any other requirements. All SERA services are FREE. It is very important that the annual SERA repeater datasheet, sent to all known repeater operators, be accurately updated each year and returned to SERA.

PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally, in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

Let's Look At It--- This Way !!!

Marvin Whatley, AA4YW

"A man who is not yet 30 and is not a liberal has no heart, and a man who is over 40 and is not a conservative has no brains." This thought, with minor variation, has been attributed to several different statesmen and, as a quote from François Guizot, dates back to the early nineteenth century. Others who may take credit include Benjamin Disraeli, George Bernard Shaw, Woodrow Wilson, Winston Churchill and Wendell Wilkie. I subscribe to the thought but have no expectation of making this list. It seems to be the role of youth to undertake, with minimal reflection and absence of caution, the reformation of a world that they have just begun to experience. In my ninth decade I remember long ago when I was a liberal. On "Student's Sunday" in 1949 (I was a graduate student in Ames, Iowa at the time), I was selected to take the pulpit at the First Presbyterian Church in Des Moines and I delivered a sermon with the theme "your youth are different from you and hold different values, but you must let them run." Everyone was appropriately polite. Over the years I have seen many new values established, not all of which are cherished, and quite a few traditional values discarded, not all of which go unlamented.

We are all familiar with the changes that have shaped our culture and make life different from life in the past. To cite a few for the record: we have many more people; we are very much more mobile; our houses and living accommodations are much more luxuriant; we communicate among ourselves more; Entertainment, sports, local news, world events and general intellectual noise flood over us; and our government has assumed a dominating role in even the little procedures and practices that constitute daily living. There seems to be a general consensus that these changes are good and humanity hereby enjoys progress. No one, by the way, asked me. But it doesn't matter because no one asked anyone and most of it was not the consequence of deliberate acts but was moved into place by some primal force beyond our understanding. In the face of such colossal change it is foolish to expect human values to survive unaltered. But as we see, one at a time, the things we thought were fundamental and eternal not simply abandoned but often debased, lampooned, prostituted or ridiculed, we may wail into the engulfing miasma, "is this really the way we want to go?"

A scout is Trustworthy, Loyal, Helpful, Friendly, Courteous, Kind, Obedient, Cheerful, Thrifty, Brave, Clean and Reverent. For almost a hundred years this was the Boy Scout Law. Look at those words and ponder what they mean. Once upon a time they were used to describe a person of character. We no longer speak of character except to describe a weirdo or a subject in a fictional work. There isn't one of these that would be considered a "cool" attribute in today's culture and most young people and all adults would snicker at their implications. The important attributes today are techniques for manipulating the system, an appropriate fear of chemical or environmental dangers, and a behavioral compensation for vulnerability to abuse or scams or legal entanglement. But it gets worse. The words in the Boy Scout Law are still used today and are honored in ritualistic form, but, like the constitution of the United States, they have been redefined or glossed over or relegated to the state where "yes, we say that, but everybody knows that in actual practice..." and they impose no impediment on our youth.

We humans are special animals with special attributes that set us apart from our inferior relatives that swing in trees. Maybe it is our opposable thumb that does it, but we like to think it is the larger brain that we have developed into a mind that allows us to think. We have used it over the history of our species (about a hundred thousand years) to bring us to where we are today. Two important manifestations of it are our adaptability to variable ambiance and our ability to establish cultural units to accumulate knowledge, preserve it, and pass it on to our young. These sometimes work against each other. Our children awaken in our modern, comfortable world surrounded by things that do things for them. This is their world and they get to know it

fast and well and move easily and effectively in it. As far as they are concerned this is the only world there ever was and they quickly devise how it could be better and contrive additional things to want. The stories about hunger and pain, or being cold and miserable are fictional stories like "Power Rangers" or "Star Wars" or World War II.

It is not hard to find fault with our culture, especially when new ideals and standards are constantly being synthesized. When one abhors a disparity in wealth or discrimination on the basis of race one is moved to corrective measures and when old customs or rituals get in the way it seems appropriate to discard them. To cite historical justification for restraint is futile, but I will dwell on it anyway.

The human animal is not free from hereditary constraints. It is now well documented that there are behavioral patterns that are present at the DNA level and things that we will do because we are human. These were evolved by the success of particular human action and we survived because of them. For many thousands of generations men and women held different roles in society and this is genetically what we are. To suddenly decide that for all of this time humanity was wrong, but we have fixed it now, may present some problems. But maybe we have. Similarly, when we point to the colonial south in condemnation of slavery it is implied that those white demons invented it for diabolical purposes. In fact, as all structural monuments to ancient cultures testify, slavery had been an important part of humanity since the beginning of civilization. Principles driven deep into modern morality find this deplorable, but our abrupt corrective action, a hundred and fifty years ago, is still sending devastating waves of disruption through our nation.

There has never until now been a world like the one in which we live. That it is rapidly changing technologically, socially and physically is certain. Further, the rate of change of the change is positive and virtually exploding. The world belongs to our youth who are more intent on fixing it than any generation ever. The fact that this generation of fixers, caught up in technological gadgetry and consumer affluence, is further removed from natural reality than any generation ever does not matter, and they have already decided that history is irrelevant. With gasping breath I issue them a simple warning: "Do your best, because in a few years you will be kicked out by a new generation that will be even more spoiled than you."

Get The Hammer!

... and let's get technical

Randy McKenzie, KK4EJ

All I want for Christmas!

Hello all! I hope everyone is enjoying the spring!

This has been a very busy fall and winter for me with kids, work and the schools for the new STARS System. I've been to Schaumburg IL several times now for various classes. The last trip up was a few weeks ago and while there the Hams in our VSP group got to visit the Motorola Ham club K9MOT. The room is inside the plant and our host gave us time to dial along the HF rigs and to see the various radios. Needless to say it was interesting and fun.

I recently sat down with a Ham catalog and looked in detail at the various rigs out there. I admit I'm very behind on new toys coming to us because of time, but now I had time to look a little bit! To say the least I am impressed by the new toys, with the frequency ranges, power levels and "it does everything" modes. Several offer a detachable control head, which is a GREAT feature for mobile. Seems everything in the cars today are smaller and NO dash space anywhere! I have long legs and I'll even say they forget to have leg room, too! Don't get me started on where to gain access thru the firewall to run the power cables!

Only a few years ago our choices were very limited. Today we have a single rig from 160 meters into the microwave ranges! Portables or "handie talkies" are even smaller than the old " pack of smokes". I think it's a great time to be a Ham! A $130 2 meter rig comes packed with data ready, TNC on board AND over 200 memory channels. One type even has over 500 channels!

If my wife reads this, I hope she will ask me what I want for Christmas!!!!!!!!

I want to thank the many of you that have sent emails, letters and even pictures about my articles. My recent article about the enjoyment of building and home brewing gear had several responses and pictures! Thanks for the many kind comments. I always enjoy hearing from you.

I normally base my articles on what's going on with me, funny stories or other events that happen along the way. Honestly, writers block kicks in sometimes too! Please drop me a email, it helps me to write and the feedback (good and bad) helps me know which direction to go!

Some discussion was made about including some simple "How to" articles in the RJ, and I'm asking you the readers of my column if that would interest you. It doesn't have to be complicated things; even a small simple project can be fun to build. Maybe it's a simple switch to select audio, or even a computer controlled something. I'd like some suggestions!

Recently we had an antenna go bad on a base. I responded with some cable and parts and got the base back on the air. I was satisfied with the temporary setup until the tower crew could respond and replace the normal antenna. The tower crew arrived and inspected the situation, made the repairs and then started on me. The antenna I used was a Cushcraft Ham antenna and some RG8 coax. The part they ribbed me about was the mounting. I looked all over the site trying to find something to mount the antenna on and found the only "thing" that could possibly use. A few cable ties and YES a wrap of duct tape and the mount was complete! 150 watts forward, zero reflected and 3 db of gain! All neatly mounted on a BROOM HANDLE and attached to a fence post. It wasn't pretty, but dog gone it worked!

Sometimes you just have to do what you have to do! I got it back on the air...all during 60 mph winds!

'Till next time, Hang in there, I'm pulling for ya,
we are all in this together!
GOD Bless!

Society of Broadcast Engineers Announces Show in Roanoke

Chapter 78, the Blue Ridge Chapter of the Society of Broadcast Engineers (SBE) has announced that they are sponsoring a regional trade show for radio and television and related users of video and audio. The Broadcast General Store is co-sponsoring the show.

The exhibition will be held in the Roanoke, Virginia, Civic Center convention center on July 17, 2008. Over 50 vendors of technology and services will be exhibiting, making it the largest trade of its kind in this region in over a decade.

There will be education opportunities as well, with tracks of papers and programs being presented throughout the day. There will be seminars for Radio, Television and Management.

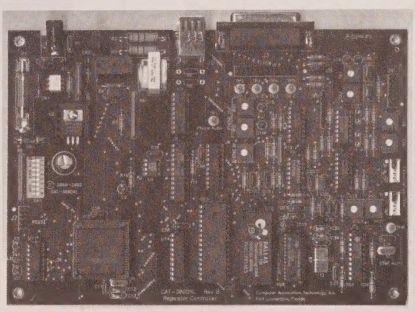
Attendance for the exhibition and the programs is free.

"Our SBE Chapter is dedicated to making sure people who work in broadcast and related technologies have every opportunity to learn and keep up in the constantly changing landscape. This program is a unique opportunity for anyone interested in communications technologies to see these technologies first hand, and to update their knowledge base, without the expense and time of traveling to far away trade shows like NAB." said Tom Atkins, chapter program chairman. "This event will also give attendees a chance to meet, mingle and learn from their peers throughout the region."

More details on programs will be announced as they are finalized. Information can be obtained by contacting Eddie Durham, chapter chairman, at ecs@rev.net, or Tony Mancari, event chairman, at <tmancari@wvpt.net> , or by visiting Chapter 78's web site at <www.sbe78.org> for updates. Visitors to the site may also learn more about the DTV transition, download the latest chapter newsletter, and link to the national SBE web site.

CAT-300DXL Repeater Controller

The CAT-300DXL has all the features of the very popular CAT-300DX including a full feature autopatch and a Remote Base Port.



Features Include:

- *Voice Synthesizer ID*
- *(20) Voice Messages*
- *Real Time Clock*
- *(20) Position Scheduler*
- *Full Feature Autopatch*
- *(100) User Speed Dials*
- *Emergency Speed Dials*
- *Reverse Autopatch*
- *Remote Base Port*
- *CW Identifier*
- *(20) User Macros*
- *DTMF Audio Muting*
- *DTMF Pad Test*
- *(4) Logic Inputs*
- *(4) Output Switches*
- *Optional Windows® Editor*

Ordering Information

CAT-300DXL *Controller Board, Wired & Tested* ***$399.00***
RME-1000 *Rack Mount Enclosure* ***$99.00***
ED-1000 *Windows Editor* ***$69.00***

Mississippi

Charles Diamond, K5ASL

Greetings, Mississippi.

Well, it has been a little while since we last had a column here in the Journal. All is well here in my part of the world. We have finally gotten moved and I have put up a few antennas. So things are getting back to normal I hope.

APRS seems to be taking off around the state. The efforts of several clubs, The Lamar County Amateur Radio Club and The Hattiesburg Amateur Radio club have been making great progress. Jimmy Ready, N5LRQ, and Steve Grantham, AA5SG, have been working quite a bit on getting links for APRS from here in the south towards the middle of the state. Other folks should be mentioned also, among them Dale Hankins, KB5VE, who had the first INTERNET link around our area from APRS to the web. Hopefully we will have a great network to use after another disaster; which we don't need any of those any time soon.

The Jackson Amateur Radio Club held their annual Hamfest and ARRL convention on February 1 and 2. The turnout seemed great. I had a great time visiting with some of y'all; and was happy to see CT Morgan of Chattanooga TN in attendance as one of the dealers at the hamfest. Over all we had a great time representing SERA and visiting with all of the area Hams.

The K5PRC group seems to be making great progress with their group in Pearl River County. Looking at the ARRL Mississippi page, I found that they had installed a new antenna for their 145.210 machine.

April 5th the Hattiesburg ARC held their annual Junk in the Trunk. All reports I have heard have told that a decent turnout showed up, and everyone involved had a great time.

Well that is about all I have this time hope to have more news for you folks later.

73, k5asl

Just a few snapshots of the recent JARC Hamfest, thanks to Bob Bullock, K5RWB

Signal Fades on 50-Year Tradition

The following text is a press release posted on the Shelby (NC) Amateur Radio Club web site. Hopefully we will have an ad in the August issue announcing their new plans. To stay up-to-date on developments, please visit the SARC web site at <www.shelbyhamfest.com>.

It is with much regret that the Shelby Amateur Radio Club has made the decision not to have the 2008 Shelby Hamfest at the Cleveland County Fairgrounds.

After 6 months of visiting the Fairgrounds on a regular basis to try to get a contract, we received a non-negotiable contract in the mail that makes it seem apparent the Fair Association does not want us to be there. The proposed contract cut our use of the grounds in half and increased our price by 30%. They also added two (2) limitations to the contract, both of which are things we have been doing as long as we have been using the fairgrounds, and the fair manager knows are necessary for us to accommodate our guests and vendors. A letter was sent to the board chairman, Teri Bullock outlining our needs and requesting the courtesy of a face-to-face meeting to try to negotiate. The letter asked for finalization by March 28, 2008, so that we could continue our planning for the hamfest. Since we did not get a reply, we have no choice to cancel our plans for the 2008 Hamfest.

We would like to apologize to the motels, restaurants, and other businesses in the county for loss of revenue caused by this cancellation. Estimates we have received (from the County Commissioners) indicate that approximately 1/2 million dollars is normally added to Cleveland County's economy during this event.

We also want to apologize to the charities and organizations of Cleveland County, which have received a share of the profits from our Hamfest. We appreciate the help you have given us during this event.

We will have fundraisers to help keep our repeaters and emergency equipment operational, and hope to be able to continue to provide radio communication and support to Cleveland County.

Options for a smaller Hamfest will be explored if other properties become available within the Cleveland, Gaston, or Rutherford county area.

Robby Hamrick, WA4RH
Hamfest Chairman

Nostalgic Wavelengths

David Bower, K4PZT

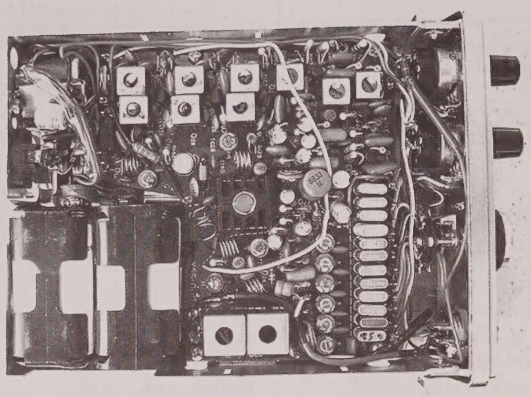
The "transition years" during the period starting in the late 1960s, and continuing for several years, brought about many changes in amateur radio equipment. The changes, while they were occurring, seemed subtle enough; but taken collectively over a few years, were really startling. Prior to this period, amateur radio equipment was primarily manufactured in this country. Towering names such as Collins, Hallicrafters, National, Johnson, Hammarlund, HeathKit and others seemed without competition, but that would change in a few short years. Companies such as ICOM, Yaseau and Kenwood, based in other countries, were starting to offer quality equipment in the United States. Amateur equipment was typically constructed with intricate metal cases that were intended to last a lifetime. Careful design work and hand-wired circuitry were a hallmark of that period. And, of course, vacuum tube technology ruled. In the years that followed, solid state devices started appearing in equipment. First it was a hybrid approach, with vacuum tubes still dominating the equipment. Then integrated circuits started to appear. Now entire circuitry could be contained in single building blocks. This evolved to a point where only the final amplifier tube or tubes remained. The big well built analog tuning mechanisms started to be replaced with digital displays; first with LED technology, later with more sophisticated LCD units. Frequency control was achieved with crystals or carefully regulated variable frequency oscillators (VFOs). But crystals were expensive and limiting in nature and VFOs, no matter how well designed, usually had an inherent (if small) frequency drift component. Enter the era of frequency synthesized circuits for precision (and stable) frequency control.

The Drake TR-22. Note the shoulder strap for carrying the unit and the push to talk microphone. The speaker is located at the back top left of the cabinet. The internal telescoping antenna is shown at the top left of the front panel.

Swan made a model 500C transceiver that could generate a SSB PEP signal of over 500 watts. And the typical cost was about "one dollar per watt." For six meters, they made a model 250-C. Drake had the R-4B receiver and T-4XB transmitter "twins" that looked, and performed great, in any shack. The receiver had 10 tubes, 10 transistors, 2 integrated circuits and 17 diodes. The transmitter had 11 tubes, and only 3 transistors. Together, these units sold for almost one thousand dollars--quite an amount of cash for the worker during this period. Other equipment from this period included the Spectronics FTDX-400 at $600, the HeathKit HW-100 for $240, the Galaxy V Mark 3 for $420 (and it produced 500 watts PEP input) and the Hallicrafters SX-146 receiver and matching HT-46 transmitter for $700. If you wanted a solid-state receiver, Hammarlund had their HQ-215 for $530 and National had an HR0-500 for over $1,600!! By the way, a QST membership and subscription (as a comparison) was only $6.50 per year.

In the early 1970s, Drake, Sonar, Clegg, Wilson and others offered VHF-UHF solid state transceivers. At first, crystal control was the norm, but frequency synthesized units soon started to appear. A solid-state Drake TR-22 sold for about $200 and had provisions for six

A close view of the front panel. Features were basic with a power switch, volume, squelch and channel knob to select internal crystals.

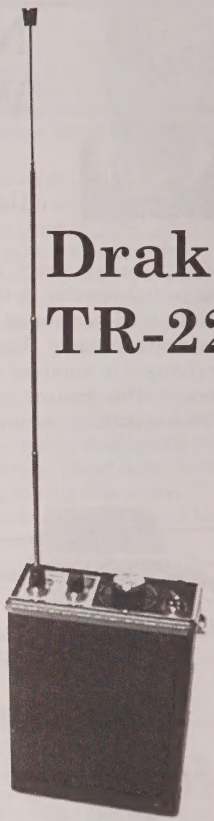


An internal view of the transceiver. The crystals are arranged vertically on the right. The internal battery power pack is at the bottom left.

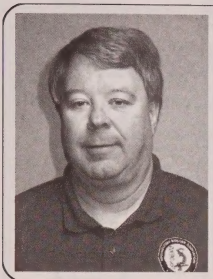
crystal controlled channels (and crystal pairs for EACH channel added to the cost). It had a "whole one watt FM output." More sophisticated two meter rigs such as the Clegg FM-27B (at $400), the Sonar FM-3602 (at $350) and others were available. If you wanted a digital display, Clegg had a FM-DX unit available for almost $600 ! About 1975, Wilson introduced a 2 meter crystal controlled HT for approximately $200 with 6 channels and 2.5 watts output. The HT weighed one pound, four ounces (without battery) and was almost 9 inches tall. Compare it to modern, much smaller HTs such as the Yaesu VX-3R weighing approximately 5 ounces (with battery/antenna), and the size of a pager. Back in the HF arena, Yaesu offered a great transceiver (the FT-101E) for roughly $750. Kenwood had their TS-520 for slightly less money. And a separate VFO, for split frequency operation, added to the cost. Both provided more than 100 watts PEP output and could accommodate an add-on external VFO for "slit frequency" operation; crucial for working rare DX. And Hallicrafters had a FPM-300 transceiver for about $600. These transceivers, typical of the period, were often solid state except for the final amplifier and driver. If you wanted to move up in performance, Signal One had their CX7A, providing 500 watts of PEP power with dual VFOs for split frequency operation. But that came with a hefty price tag--over $2,000 ! HeathKit introduced their SB-104 HF transceiver with digital display for only $700.

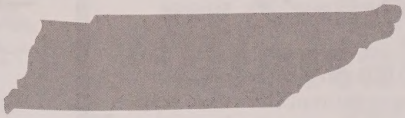
When you look at modern low cost HF transceivers such as the ICOM IC-718 and similar units, it soon becomes evident how much more radio you get for your money. In the VHF range, good quality synthesized two meter transceivers are available for approximately $200 with 50 watt power ranges. And HTs are really a bargain and several nice units only cost about $200 (or even less). So next time you complain about the high cost of amateur gear, look back a few years and be sure to "adjust" for the cost of inflation. I think you'll soon see how much more radio you can get for your "bucks," and at a lower cost.

Drake TR-22



The Drake-22 was a well built and versatile two meter transceiver for its time. It could be used for mobile operation in a vehicle using external 12 volt power. Or it could be removed and used as a "semi-portable" unit with its internal battery supply. A shoulder strap facilitated carrying the transceiver. In this mode, an internal telescoping antenna was available for deployment. It was not synthesized, so a pair of crystals had to be purchased for each channel when operating through a repeater. The pictures with this article show some of the features.





Tennessee

Bob Gault, KD4NEC

Tennessee amateurs chose Glen Clayton W4BDB as their Section leader in an American Radio Relay League election concluded in November. The vote gave Clayton a landslide victory over challenger Jack Green, AD4LP, by a margin of 795 to 188.

Announcement of the results was on the heels of another election where Clayton won a second term as president of the Cleveland Amateur Radio Club. In his first year in office Clayton led an effort to refurbish the CARC clubhouse and to make it again functional as a back-up site for amateur radio communications. His initial efforts grew into a move to expand the building and the club is now engaged in a fundraising effort.

With a change in ARRL leadership, Clayton has appointed new people to key posts in the Tennessee Section.

Emergency Coordinator - R. Lowell Bennington WD4DJW
Traffic Manager - Thomas E. Wolfe K4CMY
Technical Coordinator - NQ4U
State Government Liaison - Ingrid Klose KD4F
Official Observer Coordinator - Michael K. Boyea KE4KMG
Bulletin Manager - Greg A. Tomerlin K4KO
Affiliated Club Coordinator - Bob Gault KD4NEC
Public Information Coordinator - Ron Akers W8BF
Assistant Section Managers - David L. Bower K4PZT
Alex C. Graham, KE4GYR
Vollie T. Miller Jr. NA4C

Emily Bishop, WE4MB, has been appointed as an Assistant Director of the Delta Division of the American Radio Relay League by Division Director Henry R. Leggette, WD4Q, of Memphis. Previously Bishop held an appointed position in the Tennessee section coordinating youth activities where she tried to recruit other young people into the ranks of amateur radio. The 12 year-old has participated in youth activities at a number of events both inside and outside of Tennessee. Bishop attends Lake Forest Middle School in Cleveland Tennessee where she is in the seventh grade. She holds the Amateur Extra Class license. In her new role, Bishop will visit events in other states of the Delta Division, namely Louisiana, Mississippi, and Arkansas, to spread word about the excitement that comes with being an amateur radio operator. In a letter to Bishop, David Sumner, K1ZZ, Chief Executive Officer of ARRL, wrote," The success of our League as a democratic society is due in no small measure to the efforts of dedicated volunteer amateurs such as you, and I am delighted to know that you will be one of our 'official team.'" Tennessee Section Manager Glen Clayton, W4BDB, gave Bishop her certificate during a meeting of the Cleveland Amateur Radio Club, where she is an active member. She is also involved in the MARS program, Bradley County's Auxiliary Communications Service, and while her age keeps her from joining the Volunteer Examiner Program, she is a junior member of a local VE team in Cleveland. She was recently notified that she was selected to be a part of the communications team for an upcoming motor sports race.

You can keep up with the Tennessee Section at <www.tnarrl.org>.

Amateurs in upper East Tennessee have completed installation of a new repeater in Blountville on 147.000Mhz. This has been a coordinated frequency for over 20 years and the new machine can improve coverage in this area of the state. At last report there was no tone and it is open for all amateurs to use.

The Oak Ridge Amateur Radio Club was planning their first All Ham's Day and Picnic for the last weekend of April. I hope they had success in getting ham's out for some food and good fellowship. If you missed it, watch for information about the second annual covered dish dinner and tail gate swap shop next year.

If you club is having a special event or there is a deserving member of your club drop me an e-mail so I can include it in the next Journal.

73, Bob

?

Did you ever have a question about repeater rules, how to get a repeater on the air, how to sell your repeater and keep it coordinated, or were not sure that your paperwork was filled out right? Your FIRST STOP for information is your State Director and Frequency coordinator!

Questions about membership should go to the Tobaccoville address, and R-J info (the magazine) go to the editor.

Thanks for asking!

HI PRO REPEATERS

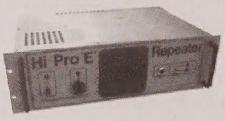
Hi Pro "R1" Repeater

144 MHz, 222 MHz or 440 MHz

Here is a compact **LOW COST** repeater (less controller) priced at just $899. A 35 watt VHF (2-meter) repeater with a computer controller, voice synthesizer, auto patch, auto dialers, user functions, etc. is priced at $1,379. This is not a kit, but a complete repeater with a two-year warranty. 222 and 440 MHz versions are also available!

Hi Pro "E" Repeater

144 MHz, 222 MHz or 440 MHz



The Hi Pro "E" is the choice if you need a repeater with a built-in power supply, plus room for an extra receiver, transmitter, small duplexer and controller. The front panel provides status indicator lights, a speaker, a microphone connection, control switches, etc. Prices start at just $1,450!

If you need a receiver or transmitter as a board or in an enclosure, we can provide them. These are the same high-performance units that are used in all of our repeaters. All have our new QUALITY AUDIO AND STABLE OSCILLATORS.

Life is a JOURNEY. Enjoy the ride!

COMET and Maldol

Base Antennas

CHA-250B VSWR graph

"One person can effortlessly raise the antenna at night when no one can spot it, and take it down before daybreak. This antenna is also a great choice for portable operations, such as quick and easy mini-DXpedition to a campground or a nice tropical island! In short, the Comet CHA-250B is simple to assemble, painless to elevate and is easy on the eyes, while at the same time getting you on 6 meters thru 80 meters without the requirement of an antenna tuner and ground radials. You'll even be able to work some DX while you're at it!" -- Dan Dankert N6PEQ

COMET NEW CHA-250B BROADBAND HF/6M GROUND-PLANE ANTENNA
A newly designed broadband vertical with NO GROUND RADIALS. EXTREMELY easy to assemble, requires no tuning or adjustments and VSWRs under 1.5:1 from 3.5-57MHz! • TX: 3.5MHz – 57MHz • RX: 2.0 – 90MHz • VSWR is 1.5:1 or less, continuous • Max Power: 250W SSB/125W FM• Impedance: 50 Ohm • Length: 23'5" • Weight: 7 lbs. 1 oz. • Conn: SO-239 • Mast Req'd: 1" – 2" dia. • Max wind speed: 67MPH

COMET GP-15 TRI-BAND 52/146/446MHZ BASE REPEATER ANTENNA Gain & Wave: 52MHz 3.0dBi 5/8 wave • 146MHz 6.2dBi 5/8 wave x 2 • 446MHz 8.6dBi 5/8 wave x 4 • Max Pwr: 150W • Length: 7'11" • Weight: 3lbs. 1oz. • Conn: Gold-plated SO-239• 2MHz band-width after tuning (6M) • Construction: Single-piece fiberglass

COMET CX-333 TRI-BAND 146/220/446MHZ BASE REPEATER ANTENNA Gain & Wave: 146MHz 6.5dBi 5/8 wave x 2 • 220MHz 7.8dBi 5/8 wave x 3• 446MHz 9.0dBi 5/8 wave x 5 • Max Pwr: 120W • Length: 10'2" • Weight: 3lbs. 1oz.• Conn: Gold-plated SO-239 • Construction: Fiberglass, 2 Sections

COMET GP-3 DUAL-BAND 146/446MHZ BASE REPEATER ANTENNA Gain & Wave: 146MHz 4.5dBi 6/8 wave • 446MHz 7.2dBi 5/8 wave x 3 • Max Pwr: 200W • Length: 5'11" • Weight: 2lbs. 9ozs. • Conn: Gold-plated SO-239 • Construction: Single-piece fiberglass

COMET GP-6 DUAL-BAND 146/446MHZ BASE REPEATER ANTENNA Gain & Wave: 146MHz 6.5dBi 5/8 wave x 2 • 446MHz 9.0dBi 5/8 wave x 5 • Max Pwr: 200W • Length: 10'2" • Weight: 3lbs. 8ozs. • Conn: Gold-plated SO-239 • Construction: Fiberglass, 2 Sections

Maldol HVU-8 ULTRA-COMPACT 8 BAND HF/VHF/UHF VERTICAL ANTENNA
80/40/20/15/10/6/2M/70cm Only 1/2 the traditional size and weight of vertical HF antennas, and it includes 2M/70cm! Unique radial system rotates for balcony installations, the radials can all be rotated to one side. • HF and 6M: 1/4 wave-length • Gain 2M: 1/2 wave-length, 2.15dBi • Gain 70cm: Two 5/8waves in phase, 5.5dBi • Impedance: 50 Ohm • Max Power: HF 200W SSB • 6M–70cm: 150W FM• Conn: SO-239 • Height: Only 8'6" • Weight: 5lbs. 7ozs.

COMET GP-9 / GP-9N DUAL-BAND 146/446MHZ BASE REPEATER ANTENNA
BEST SELLER!• Gain & Wave: 146MHz 8.5dBi 5/8 wave x 3 • 446MHz 11.9dBi 5/8 wave x 8 • Max Pwr: 200W• Length: 16' 9" • Weight: 5lbs. 11ozs. • Conn: GP-9 Gold-plated SO-239 • GP-9N Gold-plated N-type female • Construction: Fiberglass, 3 Sections

COMET NEW H-422 QUAD-BAND HF DIPOLE Compact 40/20/15/10M "V" or Horizontal Dipole • Max power: 1kW SSB • Length "V" Dipole: 24'3" • Horizontal Dipole: 33'10" • Shipping length: 79" • Weight: 11 lbs 14 ozs • Wind Load: 3.02 sq feet • Required mast size: 1.5" - 2.5" diameter • CBL-2000 2kW Balun included • Simple installation, band tuning and profile change

DIGITAL

FEAR OF COMMITMENT?

(Actual Size)

IC-91A

Analog/Digital Upgradeable

2M/70CM @ 5W

Wide Band Receiver w/Dual Watch
495kHz - 999.990MHz

1300 Alphanumeric Memories

Weather Alert

Optional D-STAR Digital Voice & Data

IC-91AD

Analog/Digital Ready
All the IC-91A Features Plus:

D-STAR Digital Voice & Data Ready

One Touch Reply

Voice Recorder & Auto Reply Message

Position Exchange

DX Communication Via the D-STAR System
(2M & 70CM D-STAR Repeaters now available at your authorized Icom dealer)

ANALOG & DIGITAL.

It's not just digital. Analog is there, too. Both capabilities in one radio. And what a new radio it is! With infrastructure and a family of D-STAR compatable radios, you're not buying an experiment. That said, digital is the future of amateur radio. And experimentation is a foundation of ham radio. So now you have to ask yourself, "do I pick up the analog only '91A version, which is optionally upgradeable to digital? Or do I take the '91AD, which offers digital right out of the box?" It's your choice. Commitment can be a wonderful thing.

Coming soon to your authorized Icom dealer!
